AUSTRALIAN STANDARD INDUSTRIAL CLASSIFICATION

PRELIMINARY EDITION

VOLUME 2 - ALPHABETIC INDEX

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS

CANBERRA, AUSTRALIA
1969

PREFACE

This volume contains a list of economic activities in alphabetic order, showing the 4 digit ASIC class to which each activity is primary. The aim has been to make the list of activities as comprehensive as practicable. Where it has been considered useful to do so, activities have been cross-indexed using alternative wordings (e.g. 'Cereal grain growing' is also indexed as 'Grain, cereal, growing').

2. The Index has been prepared mainly for use as a guide in locating the classes to which activities are primary, and does not contain all the information necessary for the more specific purpose of determining the class to which a particular establishment would be classified. For that purpose it is necessary to refer also to the Classification itself, and the explanatory chapters in Volume 1. The main reasons for this are:

- (a) In using the step-by-step method of classifying an establishment engaged in a number of activities, which are primary to different classes, it is necessary to consider the divisions, sub-divisions and groups to which the establishment's activities are primary, before classifying the establishment to a particular class (refer Volume 1, Chapter 4 (paragraph 31) for a description of the step-by-step method of classifying establishments). It is also necessary to take account of the relevant criteria for assessing major activity (e.g. value added or gross receipts).
- (b) In certain specified circumstances, a single activity is designated as primary to more than one class (refer Volume 1, Chapter 2 (paragraph 7) for an explanation of overlapping classes). The index entry for an activity which is primary to more than one class refers only to the class to which an establishment mainly engaged in that activity would be classified on the basis of the normal assessment of major activity (i.e. as if there were no overlapping classes). For example, mens clothing retailing is shown in the Index as primary to Class 4843 Mens and Boys Clothing, in Sub-division 48 Retail Trade. However, an establishment whose main single activity is retailing of mens clothing, but which meets the conditions specified in the definition of Class 4811 Department Stores, would be classified to Class 4811, not Class 4843.
- (c) Some activities are described in an abbreviated form, and for purposes of classifying establishments, it would be necessary to take account of some important qualifications of the abbreviated description, e.g. 'Earthmoving machinery leasing (for periods of one year or more)' would need to be qualified by reference to whether or not the establishment takes physical possession of the goods,

and whether the goods are leased with or without operator. Fuller descriptions of these activities are set out in Volume 1, Chapter 5.

3. Many of the primary activities in the Index are made up of words which denote a commodity and a process (e.g. Rice growing). The aim has been to use the process word which most effectively describes the activity, and hence some of these terms relate to variants of a more general type of process (e.g. 'growing' has been used as a variant of 'farming'). Some of the main variants used are listed below. The more general term is listed first in each line:

farming, growing, breeding, grazing
fishing, catching
mining, quarrying
manufacturing, refining, assembling, making
construction, building, erection
leasing, hiring, renting

In some instances, where an establishment's activity is unambiguously recognisable by a description such as vineyard, mental hospital or department store, process words are not used.
